

Why landscapers love Straightcurve®

Straightcurve® offers landscapers an opportunity to save time and money while providing the design flexibility needed to create beautiful landscapes. Straightcurve is a preferred choice for landscapers for several reasons, including:

Ease of installation:

Minimal tools and no special skills are required for installation of Straightcurve®, making it accessible to a wider range of team members and reducing key person risk.

Time Saving:

Straightcurve® products are designed for quick and easy installation, which can save landscapers valuable time on the job.

Easy Transport & Storage:

Flat-packed and easy to store, Straightcurve® products can reduce logistical hassles and make transportation a breeze.

No custom fabrication required:

Straightcurve® pre-fabricated products are readily available, eliminating the need for custom fabrication that can be time-consuming and costly.

A wide range of products:

With a suite of products to choose from, and compatible connections between them, landscapers have more options for installation and design.

No welding required:

With Straightcurve's connecting system, welding is not necessary, simplifying installation and reducing the need for power on site.

Countless configurations:

With the modular system, countless designs and configurations are possible and can be shaped in the field to suit any landscape.
